

Site Operations Manager

London/South East

£-attractive

I am working with a leading waste resource business who has an exciting and crucial role of Operations Site Manager available. The purpose of this role is to effectively lead and ensure smooth running of this waste site operations allowing the business to provide a high level service to its customers. You will lead and mentor a team of operational and office based personnel, ensuring an essential service is provided as well as making sure the teams have a safe, positive and productive environment to work in. The focus of the Operations Manager is to achieve production volumes, uphold health and safety and environmental standards, supporting continual improvement projects and to ensure the business continues to provide an exemplary service to healthcare industry customers. This will be achieved through the utilisation of previously proven systems and processes that have consistently retained and grown a customer base and maintain a National best-in-class service. With significant business growth ahead, the days will be busy but fulfilling knowing the work you are doing is essential to customers in the healthcare industry. To help you to achieve this, you will have the support of an experienced national team, comprising of H & S, Compliance, Engineering and Capacity planning specialists. Your role will involve but not be limited to; Providing strong leadership to multiple operational teams; Planning and management of shift rotations to ensure the Plant is running at optimal capacity; Working with onsite Transport team to ensure collection schedules are met and optimised; Ensuring health & safety regulations and environmental compliance requirements are maintained; Budget management (working with the Finance department to ensure costs for the Plant are aligned to set budgets); Responsibility for providing high quality products & services in line with set service level agreements. In order to be considered for this role you will have a minimum of 3 years' experience in managing an operational facility; Strong leadership and people management skills; Proven expertise in developing high performing teams; Experience of achieving production volumes; Knowledge of Health and safety in the workplace; Qualifications such as WAMITAB, IOSH, NEBOSH would be beneficial but are not essential; full UK driving license.
